

Typeface
interact with
facial expression

this is black letter
drawing in fwidh style
use as display type
but each character is
draw by java coding
how can i report to off

Face OSC

```
posePosition = new PVector();
poseOrientation = new PVector();

oscP5 = new OscP5(this, 8338);
oscP5.plug(this, "mouthWidthReceived", "/gesture/mouth/width");
oscP5.plug(this, "mouthHeightReceived", "/gesture/mouth/height");
oscP5.plug(this, "eyebrowLeftReceived", "/gesture/eyebrow/left");
oscP5.plug(this, "eyebrowRightReceived", "/gesture/eyebrow/right");
oscP5.plug(this, "eyeLeftReceived", "/gesture/eye/left");
oscP5.plug(this, "eyeRightReceived", "/gesture/eye/right");
oscP5.plug(this, "jawReceived", "/gesture/jaw");
oscP5.plug(this, "nostrilsReceived", "/gesture/nostrils");
oscP5.plug(this, "found", "/found");
oscP5.plug(this, "poseOrientation", "/pose/orientation");
oscP5.plug(this, "posePosition", "/pose/position");
oscP5.plug(this, "poseScale", "/pose/scale");
```

Parameters control by

Face Position

Face Direction

Eyebrow Height

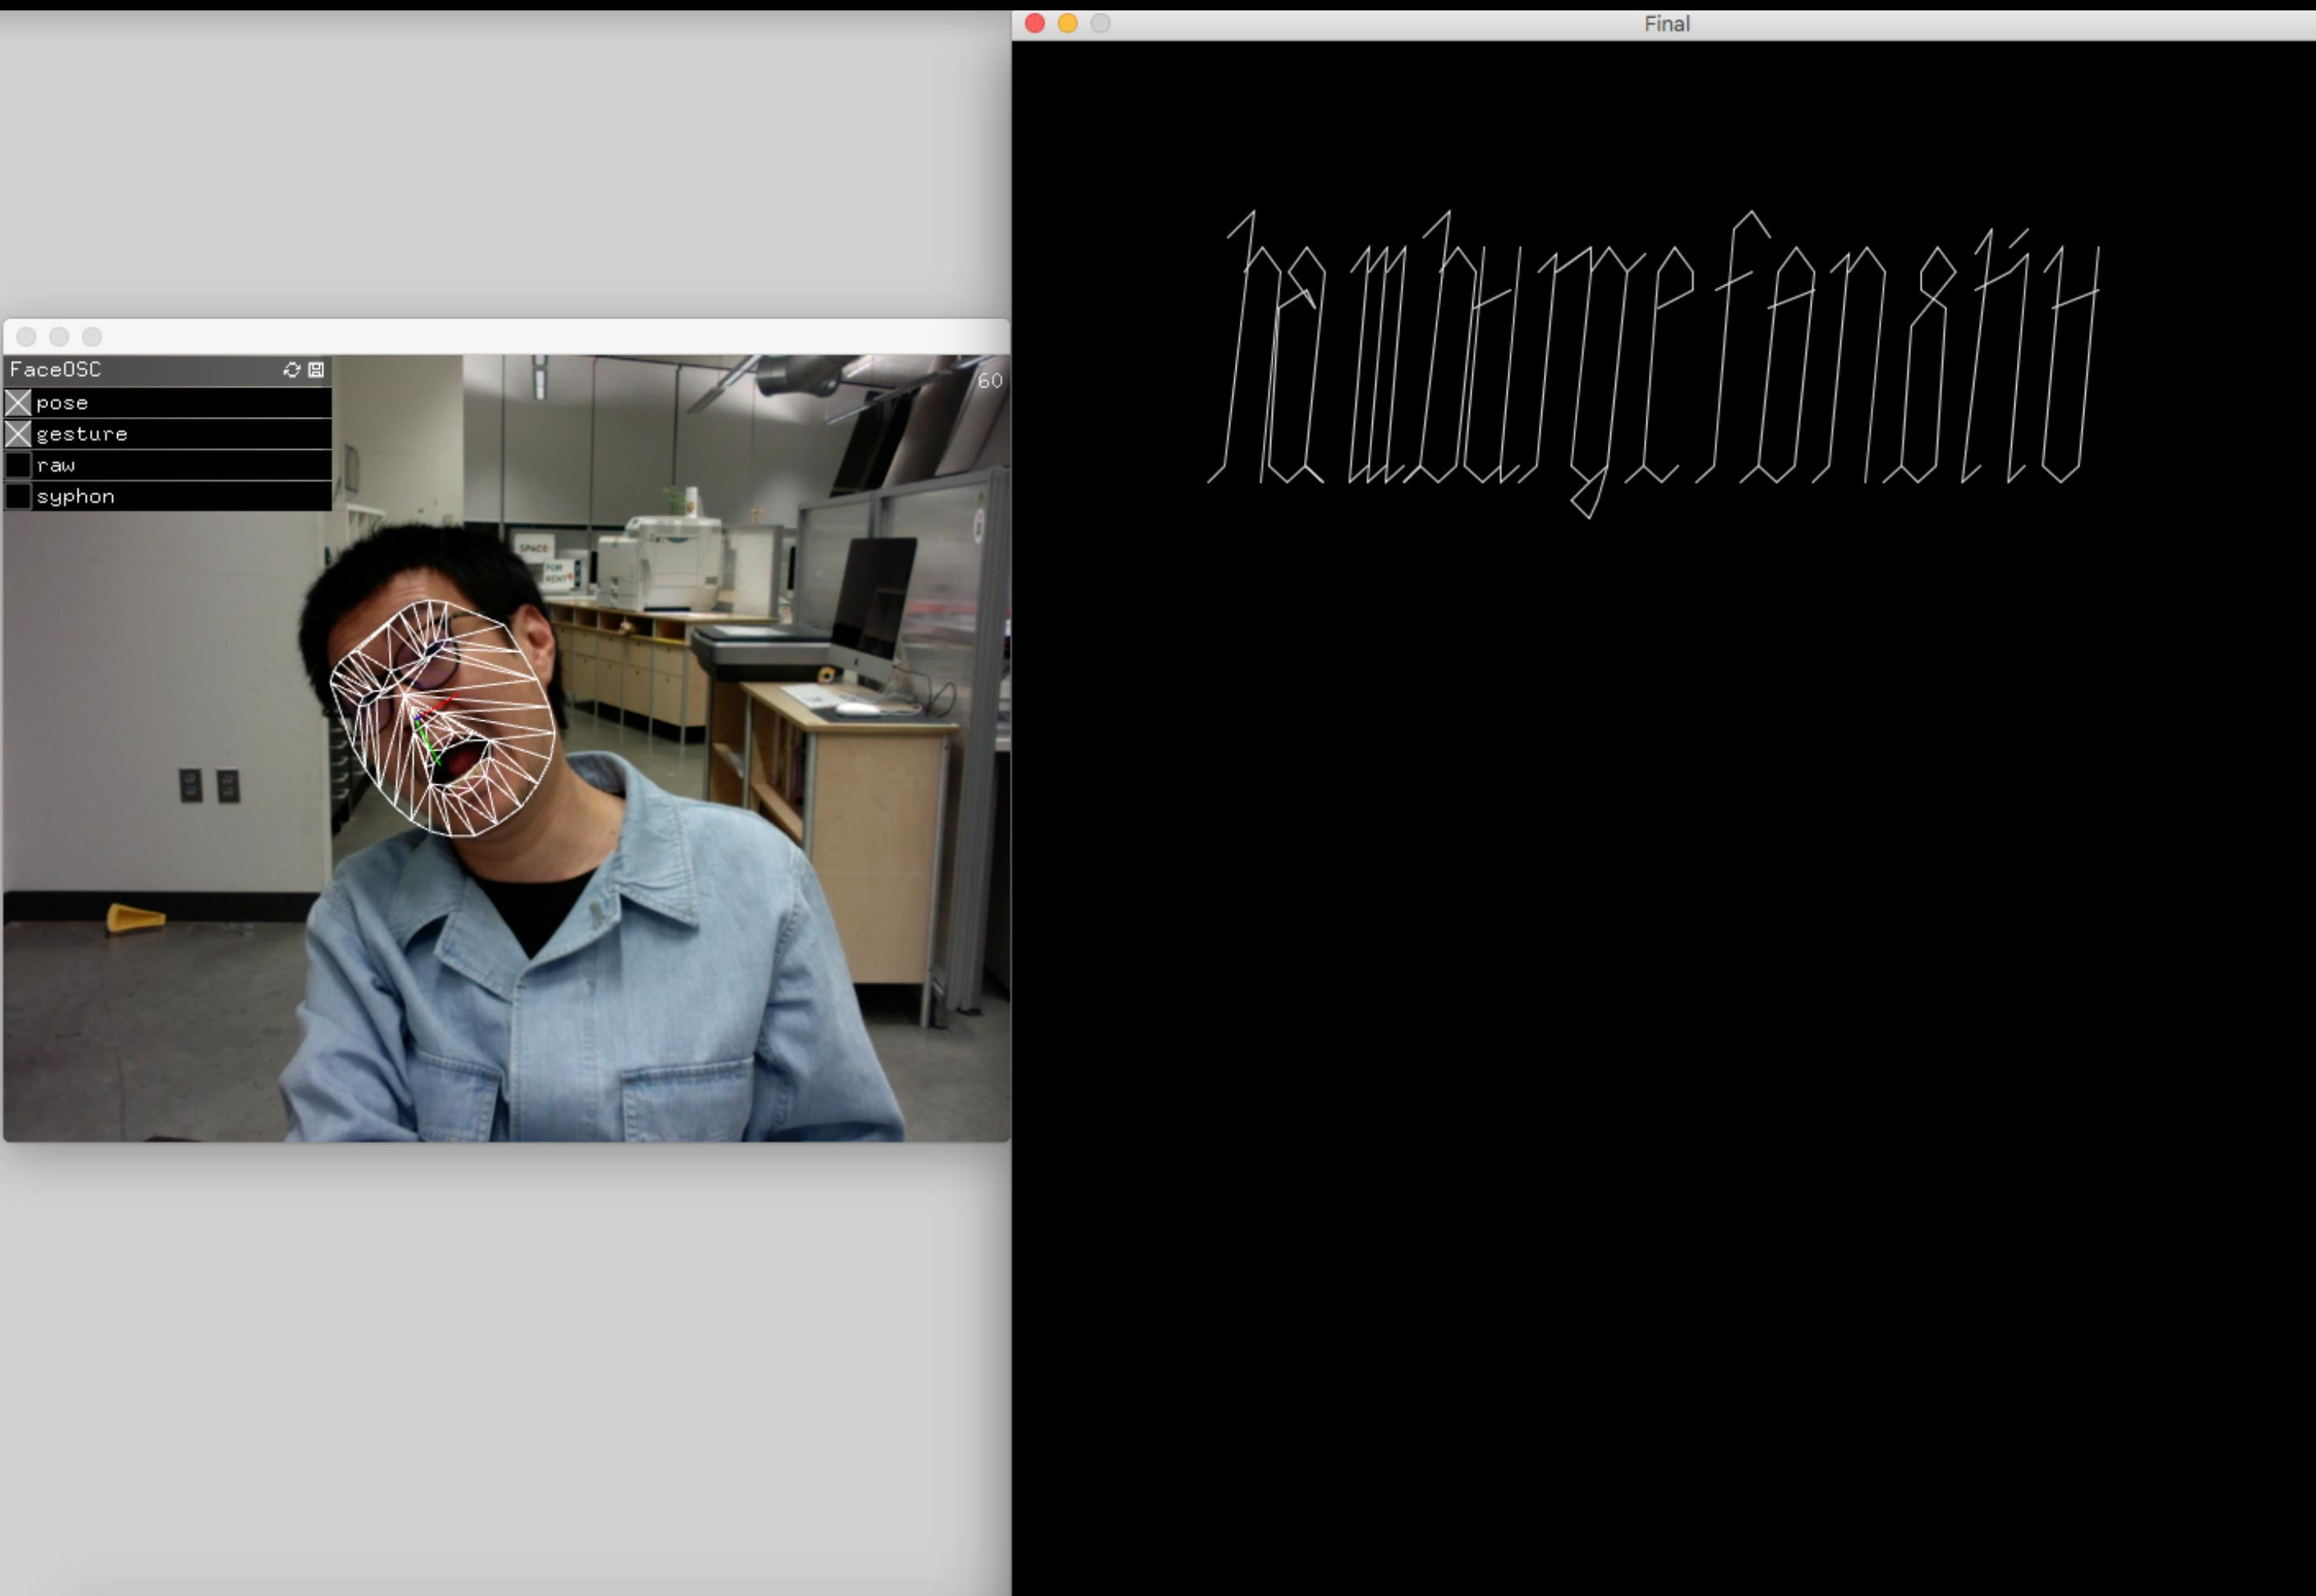

Mouth Height
